

Multi-Pet Household Co-ordination

Step	Description	Completed (✓)
Treat all pets in the home on the same day	Prevents cross-infestation	
Keep untreated visiting pets separate	Avoids re-infestation	
Clean common bedding and play areas	Shared environments = shared risk	
Use vet-approved products safe for each species	Some dog products can harm cats!	

 **NOTE: FLEAS AND TICKS DON'T DISCRIMINATE — IF ONE PET IS INFESTED, ASSUME ALL ARE EXPOSED.**
